Alibaba Cloud CDN – Project Guide

Student Name: Saleh Ahmad
Student ID: 471102482
Version: 1

1. Introduction

This project demonstrates how GitHub Pages can be used as an origin server for Alibaba Cloud Content Delivery Network (CDN).

2. Project Files

- index.html – Main webpage.
- css/style.css – Website styling.
- js/app.js – JavaScript functionality.
- api/news.json – JSON test data.
- images/logo.png – Project logo.
- downloads/guide.pdf – Project guide.

3. CDN Purpose

A Content Delivery Network (CDN) helps deliver website content to users through distributed edge servers. It can reduce latency and improve content delivery performance.

4. Project Objective

The objective is to configure Alibaba Cloud CDN to deliver website files hosted on GitHub Pages and test how CDN caching works.
